

Model 400 Mist Collector

Model # SS-400-MIST

The **Model 400 Mist Collector** is designed for mist collection on enclosed machinery and most commonly *CNC mist elimination*. In addition, this high powered mist collector may be an excellent choice for other systems that produce *synthetic coolant mist, water mist, and oil mist*. This system allows for easy integration because of its small footprint and convenient mounting options [mounting brackets are included]. This system is typically flush-mounted to the top of CNC machines without major alterations to the machinery itself. This patented mist collector offers high efficiency, quiet operation, low power consumption, and minimal maintenance. No external exhausting or ducting is required with this recirculating mist eliminator.

The unique washable mist filter collects mist vapors and conveniently drains it back into the machinery itself and may be reusable depending upon the application. **HEPA** [up to 99.97% efficiency on particles 0.3 microns and larger] and **ASHRAE filtration media** [up to 95% efficiency on particles 0.5 microns and larger] are also typical filter options for this system.

The **Model 400 Mist Collector** can provide an effective and economical solution for CNC machines, milling, grinding, and various other applications requiring mist collection. Two smaller models [*SS-200-MIST & SS-300-MIST*] and one larger model [*SS-450-MIST*] are also available.

Product Features

- Variable speed controller (115V only)
- On/Off toggle switch (220V only)
- Mounting brackets
- Washable mist pre-filter
- Quiet, reliable, and low maintenance operation
- Low power consumption
- Long filter life
- Simple, quick “no tool” filter change
- **Optional:** Magnehelic Gage, hour counter

Product Specifications

Base Unit Dimensions	Length: 22.5" (w/control box) Width: 20" Height: 25.25"
Inlet Options	4", 5", 6", 10"
Cabinet Material	16 Ga. carbon steel
Weight (approximately)	50 - 100 lbs
Air Volume (approximately)	High: 700 CFM Low: 50 CFM
Electrical	115V/1/60Hz, 2.5 amps 220V/1/50Hz, 1.5 amps 8' grounded power cord with NEMA 5-15P plug
Sound Level (at 3' from inlet)	High: Approx. 60 dba
Main Filter Options	<i>Pre-Filters:</i> Washable Mist Pre-Filter Activated Carbon Pre-Filter <i>Main Filters:</i> HEPA [up to 99.97% efficiency on particles 0.3 microns and larger] ASHRAE [up to 95% efficiency on particles 0.5 microns and larger]
Limited Warranty	Limited two year warranty from date of shipment on defects due to materials or workmanship.
Patent #	5,843,197
